Los Santos Province of the Azuero Peninsula in Panama has a storied past – with its original indigenous settlements, powerful chiefdom, and Spanish colonial rule all leaving their mark. CASA LORO | REASONS TO VISIT

Casa Loro is an astounding residence, a collection of pavilions stretch out over a private tropical Eden spanning thirty acres of lush jungle and coastal terrain embraced by a vast wilderness reserve along the Pacific shoreline of Panama. A winding network of trails, bridges and remote cabins, tying to a swimming pool, provided a captivating connection between Casa Loro and the neighbouring Panamaes Ecological Reserve— a haven of remarkable biodiversity.

The carefully designed eco-conscious splendor, crafted from local materials, finds its ultimate expression in the magical oasis, with crystalline waters of the ocean and its very own beach —Playa Puerto Escondido, as well as the tennis club and stables just a few minutes' walk from the main house.

"There was an overall effort for the house to pay respect to the ocean....you can see whales jumping and birds flying by, and during a rainstorm, the scene of a waterfall coming at you is exhilarating—very dramatic."

– Kristin Morales, co-architect of Casa Loro

If this is not enough reason to visit Casa Loro, you are encouraged to read the full feature in LVH magazine where the [architects behind Casa Loro share their vision](#) and how luxury can be intertwined with sustainability.
